Notice of Intent  
Stormwater Permit

Dear Brent,

Please find accompanying this letter two revised copies of Conservation Site Plan and Stormwater Prevention Pollution Plan dated September 6, 2023 for the above referenced site.

Upon a site walk that you performed with Patrick Seekamp you asked that Patrick review the extent of the wetlands on the southwestern portion of the site. These plans accurately identify the revised wetlands and associated buffer zones. The wetlands which start at the drill hole shown on plan are identified as flags B1-OFB4 (OF in front of the flag number indicates offset from our property onto abutters).

We have also made some additional changes to the plan such as high lighting the check dams, adding silt fence along the erosion control line within 50 feet of the wetlands and providing further information on the Stone-Driveway Storage detail.

Please let me know if you have any other questions for concerns. Patrick will be attending the next hearing.

Sincerely,

  
Thomas C Mannelta, Jr.  
Project Engineer
